PLACE VALUE CONVERSION 4-DIGITS SHEET 1

As we move a place to the left on the place value chart, the value gets ten times bigger.

3 tens = 3 ones x 10 = 30 ones.

3 hundreds = 3 tens x 10 = 30 tens (or 300 ones)

3 thousands = 3 hundreds x 10 = 30 hundreds (or 300 tens)

CLASSIFY IT! GAME #3

Classify It is a number classifying game to help children develop an understanding of, and familiarity with, mathematical vocabulary. It is quick and easy to play, and is very straightforward to set up.

Age range: 2nd Grade +

Number of players: 2-3

Learning:

- Adding up the numbers on 3 dice
- Odd and even numbers to 18
- Vocabulary:
 - Multiple of ...
 - Odd and even
 - Greater/less than ...
 - Between ... and ...
 - Not ...

You will need

- 8 different colored counters per player
- 3 dice (or 1 twenty sided dice)

Instructions

- Each player takes turns to roll the dice and add them up. The player then chooses one classification hexagon on the board which matches the total they have rolled. They cover this hexagon up with a counter.
- If a person cannot find any hexagon which matches their number, they pass the dice on to the next player.
- The game finishes when all the hexagons are covered up.
- The winner of the game is the person who manages to cover up most hexagons.

Variations

- Alternative winning strategy:
 - The winner of the game is the first person to get 3 counters in a row (vertical or diagonal).
