# RACE TO THE MOON

## ADDING TO 10

**Age range:** Kindergarten +

**Number of players:** 2 or 3

**Learning:** Add with numbers within 10

### You will need

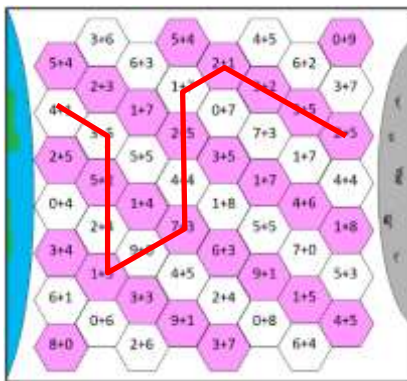

- 20 counters in different colors (one color per player)

### Instructions

- Choose an addition you want to place a counter on. You can only place a counter on a calculation which does not already have a counter on.
- Work out the answer in your head. You can use the number line to help you.
- Say the calculation and the answer.
- Your partner will check in their head.
- If you are right, you place a counter. Then it is your partner's turn. If you are wrong, you don't get to place a counter.
- The winner is the first person to complete an unbroken path of counters from the Earth to the Moon (path can go across, down, diagonally).

### Variations (if you want to change the rules)

- If you get an answer wrong, your partner can remove one of your counters from the board.
